Survivor #82

A Remarkable Story of Survival

Let's begin with an inspiring tale about our 82nd cardiac arrest survivor from the State of Hawaii Airport AED Program! Brian, an employee of Hawaiian Airlines, collapsed while working on the ramp at Hilo Airport. Thanks to the swift actions of his co-workers and our dedicated Hilo ARFF crew, Brian is now alive and thriving! A heartfelt mahalo to everyone who stepped up to assist a friend in need!

We celebrated the occasion with a CPR/AED training session at Hilo Airport for all participants. This event offered a fantastic opportunity to exchange insights, engage in meaningful discussions, and honor the contributions of everyone involved.

Another great event this last month was our Griffith Blue Heart High Performance Training for the Hale Koa & Outrigger Hotel staff. We also had a second session for NCIS, FBI, DEA, HPD, and lots of other 3-word agencies.

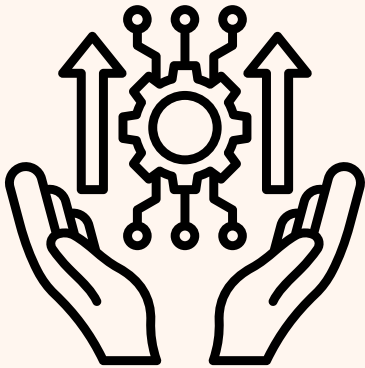

A heartfelt thank you to Philips for sponsoring this fantastic event!

HOW OLD IS MY AED?

A frequently asked question

I cherished my Blackberry just as much as any other phone, but do I still own it? Blackberrys reached their peak performance around 2009-2010. While these devices are now relics of the past, we frequently encounter clients with AEDs that are even older than my Blackberry... can you believe that?

So, how old is my AED?

For Philips, Zoll, & Heartsine AEDs, it is really easy to know the age of your device, all the details are in the serial numbers. For all other AEDs, you will need to call their tech support team to ask.

This AED is not in use, it is in our museum

HOW OLD IS TOO OLD?

X22J56377-This is a Zoll AED Plus and was manufactured in 2022-October

A04L-02403-This serial number indicates the AED is an Onsite manufactured in 2004-December

Need more information? Have questions?

November Webinar: How old is my AED?

**Plus an open Question & Answer session for anything AED.

November 17, 2025 11:00am Zoom

AED INSPECTION TIME

DOCUMENT IT

- Are your pads within expiration date?
- Is your AED readiness indicator showing ready for use?
- Is your AED clear from debris and obstruction?

NEW QUESTION: Is your AED within its warranty date?
You don't know, let's find out...

November Freebies!

In November, bring your Philips FRx AED into our office for a courtesy inspection and receive a brand new carrying case.
